

Key Stakeholder at the School

It is important for the treating psychologist to be connected with a stakeholder at the school such as a guidance officer, teachers or wellbeing staff who is available at the time of the session. This person can support the child to find an appropriate room and ensure they have the right technology.

The stakeholder and psychologist should exchange email and phone number in case the appointment needs to be rescheduled, the child is late, or not available to join the session. They can also be contacted if the child becomes distressed and needs face to face support.

Maintaining Confidentiality

It is important to maintain confidentiality when accessing Legend Land at school. The child will need access to a private and appropriate room on a recurring basis such as guidance officers' room or office, wellbeing hubs, study or breakout rooms, private rooms in the library. These rooms may need to be booked out in advance.

Technology

The school's internet will block access to Legend as it is a Minecraft server. Either of the following options below will need to be implemented.

Option 1: Laptop and Phone or Dongle

The child brings a laptop or uses one of the schools' laptops with Minecraft Java installed on it. They then use an alternative internet source such as a mobile phone or wireless dongle.

Note: A dongle is a small 'internet stick' that can be plugged into a USB port and give the computer internet access.

Option 2: Give Access to the Psychologists Legend Land Server.

The IT department at the school will be able to grant exemptions to specific website addresses. The psychologist can send their [primary and backup server addresses](#) to the IT department prior to the session to make an exemption for these addresses. This will allow the child to join Legend Land using the school's general internet.

Minecraft Java Edition

Legend Land uses Minecraft Java and schools use Minecraft Education. If a school already has Minecraft on their computers, it is likely that it is Minecraft Education which will not support Legend Land. The child will need to bring their own computer with Minecraft Java Edition or install it onto a school computer. Minecraft Java Edition can be downloaded using this link <https://www.minecraft.net/en-us/download> or by searching for 'Download Minecraft Java Edition'. Please refer to our [Minecraft Instillation Guide](#) for further details. Then the child can log in using their existing, pre-purchased Minecraft Java account or purchase a new account if required.

Picking the Time

If the session occurs during the child's favourite class or lunch break, they may be resistant to attending. Particularly if they have already started it. It can be helpful to check what class they have and look at alternative times if one of their favourite classes are on and there are alternative appointments are available.

Full Potential Psychology is committed to improving access to treatment for its clients, please contact us on (07) 3088 9799 or email us at info@fullpotentialpsychology.com.au if you have any questions.
